Note: See appendix A for an explanation of terms used.

Standard Notes: - Represents zero (D) Withheld to avoid disclosing figures for individual companies (NA) Mot available (X) Not applicable

[1]For crushed and broken stone, sand and gravel, and clay raining operations in manufacturing establishments, the number of production, development, and exploration workers was estimated from reported figures for man-hours. No data were obtained on other employees at such operations, hence, the same figures are included for production, development, and exploration workers and for all employees at such operations. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment.

[2]For 1963, all establishments reported were classified in the Crushed and Broken Limestone Sublndustry.

Represents the Glass Sand, Molding Sand, and Industrial Sand, N.E.C. Subindustries.

*For crushed and broken stone, sand and gravel, and clay mining operations in manufacturing establishments, excludes the cost of purchased machinery installed. For dimension stone only, includes cost of purchased machinery installed minus capital expenditures.

[1]Figures for the Industrial Sand Subindustriea are included with those for the Construction Sand and Gravel Subindustry.

[1]includes figures for separately reported central offices in the Bentonite Industry.
